

Mobile Agent, a mobile application for Symbian, Palm Operating System and Microsoft Pocket PC, enabling estate agents to search a database, managed from the office, for properties for sale / rent specific to a potential clients needs. Administration software is included.

Features:

- Add/Edit your listed properties.
- Manage user access.
- Reports on all listed properties.
- Search function also available from office bound PC.
- Easily deployable and easy to use.

Benefits:

- Significant reduction in paper usage.
- Reduction in visits to properties with buyers as search is specific to the buyers wishes.
- Improved data processing.
- Reduction in data capture errors.
- Radical cost savings on travel and mobile telephone communications.
