

Mobile Job Card, a mobile application for Symbian, Palm Operating System and Microsoft Pocket PC devices, enabling field technicians of various industries to receive new job orders from their call centre / office as well as the ability to return completed jobs with two signatures; one from the technician and one from the client, without having to go into the office! Admin software is included.

Features:

- Add/Edit your customers.
- Manage user access.
- Define 'Job Actions' specific to industry type.
- Signature capture and transmission.
- Re-schedule allocated jobs.
- Easily deployable and easy to use.

Benefits:

- Significant reduction in paper usage.
- Improved data processing.
- Reduction in data capture errors.
- Radical cost savings on travel and mobile telephone communications.
- Rapid turn around time in terms of invoicing the customer.
